Title: ELECTRONIC DOCUMENT SENDER SYSTEM AND METHOD WITH EXTERNAL ADDRESS  
ACCESS

---

**IN THE CLAIMS**

1. (Previously Presented) A method of electronic document sending comprising:  
sending an electronic document from an electronic document sender to an electronic document receiver having an electronic address; and  
electronically obtaining the electronic address of the electronic document receiver, via wireless communication, from an address book located externally of the electronic document sender, and wherein obtaining the electronic address further includes disposing the address book in a mobile computing device that is separate from the electronic document sender.
2. (Cancelled)
3. (Original) The method of claim 1 and further comprising:  
providing the electronic document sender as at least one of a multi-function printer, a scanner, and a digital sender.
4. (Previously Presented) The method of claim 1 and further comprising:  
providing the mobile computing device as at least one of a personal digital assistant, a mobile phone, and a portable computer.
5. (Original) The method of claim 1 and further comprising:  
providing the electronic document receiver as at least one of a facsimile machine, a multifunction printer, a desktop computer, a mobile phone, a personal digital assistant, a host server, a portable computer, and a digital sender.
6. (Previously Presented) The method of claim 1 and further comprising:  
providing the electronic address in the externally located address book as at least one of a facsimile number, an uniform resource locator, a host computer address, an network address, and an electronic mail address.

Title: ELECTRONIC DOCUMENT SENDER SYSTEM AND METHOD WITH EXTERNAL ADDRESS  
ACCESS

---

7. (Previously Presented) A method of document sending comprising:  
electronically importing an electronic address of an electronic document receiver, via  
wireless communication, from a mobile computing device that is independent of the  
electronic document sender into an electronic document sender; and  
sending an electronic document from the electronic document sender to the electronic  
document receiver using the electronic address.
8. (Cancelled)
9. (Original) The method of claim 7 and further comprising:  
imaging a paper document with the electronic document sender to produce the  
electronic document.
10. (Original) The method of claim 7 and further comprising:  
storing the imported electronic address in an internal address book of the electronic  
document sender.
11. (Previously Presented) The method of claim 7 and further comprising:  
erasing the imported electronic address, after transmission of the electronic document  
from the electronic document sender, from at least one of an activity log and an internal  
address book of the electronic document sender.
12. (Previously Presented) An electronic document sender comprising:  
an imaging mechanism configured for creating an electronic document from a paper  
document;  
a user interface configured for activating the imaging mechanism, configured for  
requesting an electronic address of an electronic document receiver from a mobile computing  
device that is external to, and separate from, the electronic document sender, and configured  
for initiating sending the electronic document to the electronic document receiver; and  
a communication module in communication with the user interface and configured for  
wirelessly obtaining the electronic address from the separate mobile computing device and

for sending the electronic document to the electronic address of the electronic document receiver.

13. (Original) The electronic document sender of claim 12 wherein the electronic document sender comprises at least one of a multi-function printer, a scanner, a digital sender, and a facsimile machine, each of which incorporate the imaging mechanism, the user interface, and wireless communication module.

14. (Original) The electronic document sender of claim 12 wherein the user interface is configured to request from the mobile computing device a distribution list comprising a plurality of electronic addresses of electronic document receivers and the communication module is configured to obtain the distribution list of electronic addresses and send the electronic document to each electronic address in the distribution list.

15. (Previously Presented) An electronic document sending system comprising:  
an electronic document receiver having an electronic address;  
a mobile computing device having an external address book with the electronic address of the electronic document receiver; and  
an electronic document sender independent of the mobile computing device and configured for sending an electronic document to the electronic address of the electronic document receiver and for obtaining, via electronic wireless communication, the electronic address from the address book of the mobile computing device.

16. (Cancelled)

17. (Cancelled)

18. (Previously Presented) The electronic document sender of claim 12 wherein the user interface comprises an internal address book including :

an internal storage and retrieval mechanism for maintaining a database of electronic addresses of a plurality of electronic document receivers, including the electronic address; and

an external retrieval mechanism, in communication with the communication module, configured for initiating retrieval of the electronic address of the electronic document receiver from the mobile computing device.

19. (Previously Presented) A mobile computing device comprising:

at least one of a portable computer, personal digital assistant, and a mobile phone, each of which includes:

an address book configured to store at least one electronic address of an electronic document receiver; and

a wireless communication module configured for transmitting the at least one electronic address from the mobile computing device to an electronic document sender that is separate from the mobile computing device.

20-22. (Cancelled)

23. (Previously Presented) A computer-readable medium having computer-executable instructions for performing a method of document sending, the method comprising:

wirelessly importing an electronic address of an electronic document receiver from a mobile computing device into an electronic document sender; and

sending an electronic document from the electronic document sender to the electronic document receiver using the electronic address.

24. (Previously Presented) The medium of claim 23 comprising:

performing the importing step through wireless communication between the electronic document sender and the mobile computing device.

25. (Previously Presented) The medium of claim 23 and further comprising:
